HOT PINK

Who doesn't love a pop of color? Hot pink is making its way back as a trendy hue this summer. You can find the eye-catching shade on celebs like Kim Kardashian, Kourtney Kardashian, and Selena Gomez.

Stunning against any skin tone, hot pink is the perfect way to add a girly touch to your look. This bold hue exudes a sexy, carefree vibe perfect for summer. And, it looks good on just about everything nails, makeup, accessories, and even fashion! Whether heading to a rooftop bar or the beach this summer, don't be afraid to turn heads in hot pink. So, stand out this season and make a statement with this on-trend color!

Bubble Tea

In the food industry, trends come and go. There were times when unicorn-colored desserts, glazed cakes, and avocado toast were all the rage. But only a few are able to stay and establish themselves as staples. For the younger generation, the equivalent of coffee or fizzy sodas is boba tea.

Boba tea is the iced coffee of the younger generation, and it looks like it's here to stay! Give it a try, whatever your age. There's no gatekeeping for this refreshing drink. Try out some new flavors and see what tickles your tastebuds!

YOUR SUMMER GO-TO

Some fashion pieces are just must-haves in every woman's closet, and topping that list is the classic white tank top. Besides a good button-up shirt, a pair of denim jeans, and a little black dress, a white tank top is a bona fide staple. More importantly, it's timeless and versatile. You can technically pair it with almost anything in your wardrobe, and you'll look effortlessly on-point each time. For this reason, it's become a styling essential for every woman.

But, before you can achieve the look that you want, you first need to find the perfect white tank top for you. In this article, we're sharing inside information on this iconic piece.

WHY YOU MAY WANT LIP FILLER

Have you ever considered Lip Filler but was unsure of the details that go into it? Lip Filler can be very beneficial when done the correct way. Lip Fillers restore and add volume to your lips. Simple. Fillers work in many ways to enhance and improve the state of your lips.

Lip Fillers can restore lips that may be dry, cracked, and overall in need of a boost. Lip Fillers also add volume to your lips, which often times provides a boost of self esteem and gorgeous plump lips.

During the procedure, Trilogy uses many tactics for distraction as well as for the best results. One thing Trilogy uses is Accuvein. Accuvein essentially is used to avoid “invisible” veins that may cause bruising. Accuvein allows your Lip Injector to navigate correctly in order to avoid as much bruising as possible.

You may be wondering about the post care of Lip Fillers. Post care is simpler than you might think. A few things to know ahead of time are that your lips will be swollen. This is very normal and goes across the board for everyone, your lips will look different during the healing process vs. once they are completely healed. Post care is not complicated, but very useful when followed diligently. You will want to sleep on your back with your head elevated for 1-2 weeks after. You will also want to avoid aggressive kissing for 1 week! Trilogy highly suggests Alastin Post Injection Serum to use as a soothing balm during the healing process. Another reason you will want to be diligent with a soothing balm, is because your lips may be very dry during this time.

Lip Fillers are a great option for someone who may want fuller lips, but also one who may need a little bit of a boost to enhance their lips overall. For more information about Trilogy's Lip Injection process, please give us a call at **801.747.2273**. We would love to tell you more!
