A FACIAL FOR FALL

The pumpkin facial is back, a fall favorite here at Trilogy. If you are wondering just how pumpkin can enhance your skin keep reading. Pumpkins contain vitamins A, C, and E, all of which are remarkably beneficial to ones skin. Let's break it down. Vitamin A is essential for your upper and lower skin layers. Vitamin A can help prevent damage rom the sun by breaking down collagen, it aids in protecting your skin from the sun. Vitamin C is a very popular skincare need. Vitamin C keeps your skin tight. Essentially, it prevents from the aging process. As you age, your collagen does not produce as it needs, Vitamin C comes in to boost collagen growth. Vitamin E is similar to Vitamin A in the fact that they are both antioxidants that can play a huge part in protection from UV rays. Vitamin E has many other benefits such as moisturizing, prevention, and more. The combination of these 3 vitamins in the Pumpkin Facial is an excellent choice to keep your skin healthy this fall.
